Sai Komal

PRODUCT DESIGNER | AI & ENTERPRISE UX

+91 9505455999 | chundurisk1999@gmail.com | chsaikomal.site | linkedin.com/in/chsk1999

PROFILE

Product Designer with 4+ years of experience across enterprise software, AI products, logistics platforms, and data-intensive applications. Specializes in simplifying complex workflows through user research, interaction design, information architecture, design systems, and human-AI interaction. Combines Product Design with a technical foundation in SQL, APIs, data integration, and engineering to design scalable, data-driven products.

EXPERTISE

Product Design: Product Strategy, UX Strategy, Interaction Design, Information Architecture, User Flows, Workflow Design, Wireframing, Prototyping, High-Fidelity UI

Research: User Interviews, Usability Testing, Journey Mapping, Problem Framing, Feature Validation, Stakeholder Workshops

Design Systems: Atomic Design, Design Tokens, Figma Variables, Components, Variants, Documentation, Scalable UI Patterns

AI UX: AI Product Design, Human-AI Interaction, Conversational UX, Recommendation Systems, Explainable AI, Personalization

Accessibility: WCAG AA, Keyboard Navigation, Focus States, Accessible Contrast

TOOLS

Figma | FigJam | Miro
Notion | Jira | Claude
ChatGPT | Figma AI
React | Next.js
HTML | CSS | JavaScript

DOMAINS

TECHNICAL

SQL | APIs | Data Integration
React | Next.js
HTML | CSS | JavaScript

EDUCATION

B.Tech in Mechanical Engineering
Vellore Institute of Technology
2017 -- 2021

PROFESSIONAL EXPERIENCE

UX Designer May 2026 -- Present
Onliest Visakhapatnam, India

- Took REX, an AI recommendation product, from requirements through user flows, interaction models, wireframes, and high-fidelity prototypes.
- Designed AI interaction states for low-confidence, no-result, cold-start, loading, empty, and error scenarios, enabling clearer system feedback and graceful degradation.
- Built reusable Figma patterns across Marketplace, HR Admin, and Revenue products using Variables, Components, and Variants.

Product Owner & UX Designer Oct 2024 -- May 2026
ONDL Visakhapatnam, India

- Designed Kudra, a fleet and trip management platform covering trip creation, driver assignment, vehicle allocation, fuel tracking, and fleet monitoring.
- Conducted field research and user interviews with drivers, dispatchers, and fleet supervisors to identify workflow issues and simplify operational processes.
- Reduced trip-creation effort by 20% and manual operational effort by 30% through workflow consolidation and improved information architecture.

UX Designer May 2023 -- Oct 2024
Sweya Infotech Visakhapatnam, India

- Designed enterprise products across user research, information architecture, user flows, wireframes, prototypes, and high-fidelity UI.
- Conducted user interviews, usability testing, and stakeholder workshops to identify workflow issues and inform product design decisions.
- Created reusable components and design-system patterns for scalable product interfaces across modules.

SQL Developer Nov 2021 -- Apr 2023
Oracle Hyderabad, India

- Built enterprise data-integration and reporting solutions, working with APIs, business workflows, data dependencies, and enterprise reporting requirements.
- Developed internal reporting tools that improved access to business data and supported enterprise workflows.

SELECTED PRODUCT EXPERIENCE

REX --- AI Recommendation & Product Intelligence 2026

- Designed personalized recommendation flows, conversational AI interactions, multilingual inputs, and inspiration-image based discovery experiences.
- Applied explainable-AI patterns including ranking rationale, confidence signalling, and graceful degradation.

Onliest HR Admin --- Enterprise HRMS 2026

- Simplified attendance, leave, onboarding, and approval workflows across Admin, Manager, and Employee roles.
- Designed exception handling, bulk actions, audit trails, and accessible table and form experiences.

Kudra --- Fleet & Trip Management 2025 -- 2026

- Designed end-to-end fleet workflows spanning trip lifecycle, driver assignment, vehicle allocation, and route monitoring.
- Translated complex logistics workflows into scalable interaction patterns supporting faster operational decisions.

ClappIt --- Cloud Infrastructure Platform 2023 -- 2024

- Simplified complex cloud-infrastructure workflows for technical and non-technical users through clearer interaction patterns and information architecture.
- Created reusable UI components and scalable design patterns across product modules.

Hindustan Shipyard Limited --- Website Redesign 2024

- Restructured information architecture, navigation, content hierarchy, and responsive experiences.
- Used user research to improve information discovery and enterprise usability.
