Sai Komal

UX Designer

Portfolio: chsaikomal.site
linkedin.com/in/chsk1999

Product-focused designer operating at the intersection of UX design, system thinking, and scalable product architecture. With 4+ years of experience across logistics platforms and enterprise software products, I specialize in designing end-to-end product experiences that combine high-fidelity visual craft with strong design logic.

Skills

Product Design UX Design, Interaction Design, User Journeys, Information Architecture, High Fidelity UI Design
Design Systems Atomic Design, Design Tokens, Component Libraries, Scalable UI Systems, Design Documentation
Product Thinking Product Discovery, Problem Framing, User Research, Feature Validation, Product Workflows
AI-Assisted Design Leveraged generative AI for rapid UI iteration, prototyping, asset creation, and accelerated design workflows
Tools Figma, Miro, Notion, Jira, Claude
Technical React, Next.js , API-driven UI Design, System Workflows, Software Development Lifecycle (SDLC)

Work Experience

UX Designer Jun 2026 — Present
Onliest, Visakhapatnam, India

- Created end-to-end product design for REX, an AI-powered recommendation engine, translating business requirements into intuitive user experiences.
- Designed AI-driven recommendation workflows, user journeys, and high-fidelity interfaces for enterprise applications.
- Designed and enhanced the internal HRMS portal, improving employee workflows across HR operations and administration.
- Built scalable design systems using atomic design principles, reusable components, and design tokens to ensure consistency across products.
- Collaborated closely with product managers, engineers, and stakeholders to deliver developer-ready designs and streamline implementation.
- Leveraged AI tools such as Claude and ChatGPT to accelerate ideation, prototyping, UX writing, and design iterations.

Product Owner Oct 2024 — May 2026
ONDL, Visakhapatnam, India

- Contributed to scalable design systems using atomic design principles and reusable component structures, improving UI consistency across product modules.
- Led product design for logistics platforms (Kudra, Parivahan, Karta), focusing on scalable fleet and trip lifecycle workflows.
- Designed end-to-end product flows for trip creation, driver assignment, fuel tracking, and vehicle allocation systems.
- Improved operational efficiency by 20% through workflow redesign and information architecture improvements.
- Collaborated closely with engineering teams to ensure scalable technical implementation and seamless developer handoff.
- Leveraged generative AI tools to accelerate UI exploration, prototyping, and product design iterations.

Associate UX Designer May 2023 — Oct 2024
Sweya Infotech, Visakhapatnam, India

- Designed user interfaces for enterprise software platforms with a focus on workflow optimization and usability.
- Conducted user research, usability testing, and stakeholder workshops to improve product experiences.
- Built scalable UI components and contributed to design system documentation.
- Designed interfaces covering loading, empty, error, and partial-data states to improve overall user experience.

SQL Developer Nov 2021 — Apr 2023
Oracle, Hyderabad, India

- Developed data integration modules connecting Oracle PaaS with enterprise systems.
- Built internal reporting tools that improved data accessibility and reporting efficiency for business teams.

Projects

REX – AI Recommendation & Product Intelligence Platform 2025 — Present

- Led end-to-end product design for REX, an AI-powered recommendation engine, defining user journeys, interaction flows, and scalable UX for personalized product discovery.
- Designed conversational AI experiences supporting adaptive preference discovery, multilingual interactions, inspiration image uploads, and AI-assisted recommendations.
- Created reusable design systems and high-fidelity interfaces for recommendation dashboards, onboarding, profile management, Design Studio integration, and admin configuration modules.
- Collaborated with Product, AI/ML, Engineering, and Business stakeholders to translate complex business requirements into production-ready user experiences and scalable product workflows.
- Designed AI interaction patterns with a focus on explainability, trust, recommendation transparency, edge cases, and seamless human-AI collaboration.
- Defined UX flows for recommendation generation, design refinement, user feedback loops, and self-learning mechanisms to improve long-term personalization.

Kudra – Fleet Management Platform 2025 — 2026

- Designed end-to-end product workflows for fleet management and trip lifecycle tracking, covering driver assignment, vehicle allocation, and route monitoring.
- Translated operational logistics challenges into scalable product systems, improving real-time fleet visibility and decision-making.
- Reduced manual operational effort by 30% through structured workflow optimization and system-driven process design.
- Collaborated with engineering teams to define data flows, edge cases, and system logic for production-ready implementation.

ClappIt – Cloud Infrastructure Automation Platform 2023 — 2024

- Designed user interfaces for complex cloud infrastructure workflows, simplifying multi-step automation processes for technical and non-technical users.
- Built reusable UI components and contributed to scalable design system patterns ensuring consistency across modules.
- Worked closely with cross-functional teams to align UX decisions with backend logic and system architecture.

Bluenumber – Data Visualization Dashboard 2023 — 2024

- Designed interactive dashboards enabling faster insight extraction from large datasets through intuitive visual hierarchy and interaction patterns.
- Applied user research and usability testing to improve data accessibility and reduce cognitive load for end users.
- Delivered scalable dashboard patterns supporting diverse data states and analytical workflows.

Hindustan Shipyard Limited – Website Revamp 2024

- Led end-to-end UX redesign, improving navigation, information architecture, and overall usability for enterprise users.
- Conducted user research to identify pain points and restructured content hierarchy for better accessibility.
- Delivered high-fidelity UI designs aligned with organizational goals and user needs.

Education

B.Tech in Mechanical Engineering, *Vellore Institute of Technology, Vellore* 2017 – 2021
Intermediate (MPC), *Tirumala Junior College* 2015 – 2017
Secondary School (10th), *Narayana e-Techno School* 2015
