Sai Komal

PRODUCT DESIGNER | UX ENGINEER | FRONT-END DEVELOPMENT

+91 9505455999 | chundurisk1999@gmail.com | chsaikomal.site | linkedin.com/in/chsk1999

PROFILE

Product Designer and hands-on UX Engineer with 5 years across software, data work, and product design, including 4+ years in UX. Independently builds web applications using React, Next.js, TypeScript, and Tailwind CSS; integrates backend services and APIs; and brings strong and SQL capabilities. Combines enterprise UX, systems thinking, and AI-assisted development.

ENGINEERING SKILLS

Front End: React, Next.js, TypeScript, JavaScript, HTML/CSS, Tailwind CSS

APIs: REST API and backend-service integration, data-driven UI

AI Development: Claude, ChatGPT, prompt-led coding, code understanding, debugging

PRODUCT & UX

Design: Figma, FigJam, interaction design, information architecture, prototyping

Design Systems: Variables, Components, Variants, reusable UI patterns

Research: User interviews, usability testing, workshops, edge-case analysis

Collaboration: Requirements, design rationale, Product / Engineering partnership

TOOLS

Design:	Figma, FigJam, Photoshop, Illustrator
Delivery:	Miro, Notion, Jira
AI:	Claude, ChatGPT, Figma AI
Web:	React, Next.js, TypeScript, Tailwind CSS
Data:	SQL, REST APIs

DOMAINS

Enterprise SaaS and data interfaces
AI products and recommendations
Fleet and operational workflows
Marketplaces and 3D commerce

EDUCATION

B.Tech, Mechanical Engineering
Vellore Institute of Technology
2017--2021

PROFESSIONAL EXPERIENCE

UX Designer May 2026 -- Present
Onliest Visakhapatnam, India

- Designed REX, an AI recommendation product, from requirements through user flows, interaction models, wireframes, and high-fidelity prototypes.
- Defined AI response and error states, and reusable Figma patterns across Marketplace, HR Admin, and Revenue products.

Product Owner & UX Designer Nov 2024 -- May 2026
ONDL Visakhapatnam, India

- Owned product and UX workflows for Kudra, a fleet and trip platform covering trip creation, driver assignment, vehicle allocation, fuel tracking, and monitoring.
- Conducted field research with drivers, dispatchers, and fleet supervisors; workflow consolidation reduced trip-creation effort by 20% and manual operational effort by 30%.

UX Designer Oct 2022 -- Nov 2024
Sweya Infotech Visakhapatnam, India

- Designed enterprise products from research and information architecture through user flows, wireframes, prototypes, and high-fidelity interfaces.
- Conducted interviews, usability tests, and stakeholder workshops; created reusable components and design-system patterns.

SQL Developer jul 2021 -- Sep 2022
Oracle Hyderabad, India

- Built enterprise data-integration and reporting solutions, working with SQL, APIs, business workflows, and data dependencies.
- Developed internal reporting tools that improved access to business data and supported enterprise workflows.

SELECTED UX & PRODUCT PROJECTS

REX -- AI Recommendation & Product Intelligence 2026
Designed conversational and personalised recommendation journeys, multilingual inputs, and inspiration-image discovery; defined confidence, ranking rationale, no-result, loading, and recovery states.

Onliest HR Admin -- Enterprise HRMS 2026
Designed role-based Admin, Manager, and Employee workflows for attendance, leave, onboarding, and approvals; addressed exception handling, bulk actions, audit trails, and accessible data-entry patterns.

Kudra -- Fleet & Trip Management 2025--2026
Led UX across trip creation, driver and vehicle assignment, fuel tracking, and fleet monitoring; field research and workflow improvements reduced trip-creation effort by 20% and manual operational effort by 30%.

ClappIt -- Cloud Infrastructure Platform 2023--2024
Simplified complex cloud-infrastructure workflows for technical and non-technical users through clearer information architecture, navigation, and reusable interface patterns.

Hindustan Shipyard Limited -- Website Redesign 2024
Restructured navigation, content hierarchy, and responsive page experiences to improve information discovery and enterprise usability.

INDEPENDENT ENGINEERING PROJECTS

GITAM Marketplace -- Product Design & Web Development Independent
Independently designed, built, and deployed a university marketplace; implemented the front end with React, Next.js, TypeScript, and Tailwind CSS, integrating backend services for product workflows.

Reality 3D -- 3D Commerce Platform Independent
Designed and developed a 3D-printing commerce experience with product discovery and customer-facing manufacturing workflows; implemented front-end features and backend/API integrations.

HotelFirst -- Business Website Independent
Designed, developed, and deployed a responsive business website, translating service needs into clear information architecture and customer-facing page journeys.

Personal Portfolio -- Design & Development Independent
Built and maintain a portfolio showcasing product case studies, design decisions, and hands-on web development work.
